PROFESSIONAL SUMMARY

Full Stack Laravel Developer with production experience shipping multi-tenant web apps for payments, logistics, and document workflows. Builds end-to-end features in Laravel 12 (Livewire, Eloquent, queues, Fortify auth), MySQL, and Tailwind — from REST/webhook APIs to admin dashboards and cloud deploys. Strong in payment integrations, idempotent APIs, Redis jobs, and CI/CD on DigitalOcean. Seeking a full-time Full Stack Laravel Developer role.

TECHNICAL SKILLS

Laravel Stack: Laravel 12, PHP 8, Livewire/Flux, Eloquent ORM, Blade, Inertia.js, Fortify, Socialite, Queues, Events, Policies, Form Requests

Full Stack: REST APIs, Webhooks, MySQL, Redis, Tailwind CSS, Bootstrap, Alpine.js, React, JavaScript/TypeScript, JWT, 2FA

Integrations: Coins.ph payments, Ninja Van logistics, merchant APIs, QR payments, PDF generation (dompdf/FPDI), email/notifications

DevOps: Git, GitHub Actions CI/CD, Docker, Nginx, PHP-FPM, systemd, DigitalOcean, Hostinger, Azure

Also: Node.js, FastAPI, React Native, SQL Server, Swagger/OpenAPI, Solidity/Hardhat (Polygon)

PROFESSIONAL EXPERIENCE

Full Stack Laravel Developer — DocuTrust

May 2026 – Present

E-Signature & Notarization Platform · Freelance / Remote | Live: sign.docustrust.tech

- Built full-stack e-signature and notarization product in Laravel 12 + Livewire: document upload, drag-and-drop signature fields, PDF stamping/sealing, and certificate generation.
- Modeled domain data with Eloquent (documents, signers, certificates, e-invoices) and secured flows with Fortify auth, JWT, and Google 2FA.
- Implemented Redis-backed Laravel queues for PDF processing, notifications, and e-invoicing so long-running jobs stay reliable under load.
- Designed idempotent Laravel API endpoints with idempotency keys so document and invoice actions are safe to retry without duplicates.
- Shipped GitHub Actions CI/CD with zero-downtime releases to DigitalOcean (Nginx, PHP-FPM, systemd queue workers).
- Added optional Polygon hash-anchoring via a Node.js sidecar for tamper-evident document verification after signing completes.

Full Stack Laravel Developer — GatewayHub

Feb 2026 – Present

Payment Operations Platform · Freelance / Remote | Live: gatewayhub.io

- Developed Laravel payment ops dashboard: gateway management, API keys, transaction monitoring, exports, and developer docs in one place.
- Integrated Coins.ph and merchant APIs with Livewire UI + REST endpoints, including dynamic QR payment generation for production use.
- Implemented idempotent payment APIs and webhook controllers to prevent duplicate charges when payment gateways retry events.
- Authored merchant-facing API documentation and exposed clean Laravel routes/resources so partners can integrate independently.
- Deployed and maintained the app on DigitalOcean (domains, env config, Nginx) and resolved production payment/debug issues end-to-end.

Full Stack Laravel Developer — Suretrack

Jan 2026 – Mar 2026

Logistics & Delivery Dashboard · Freelance / Remote | Live: suretrack.spcardealer.com

- Built Laravel 12 + Livewire logistics dashboard for orders, delivery tracking, COD monitoring, product specs, and operational reports.
- Integrated Ninja Van APIs and Laravel webhook handlers for real-time delivery status; made handlers idempotent for safe retries.
- Added Google OAuth (Socialite/Fortify) and full-stack notification flows; deployed the application on Hostinger with domain setup.

SELECTED PROJECTS

NCIP — Hybrid Blockchain + ABAC Management System

Capstone · Laravel

Internal records and case platform (IP census, document registry, IPMR, FPIC, audit logs) with ABAC permissions and tamper-evident record hashes.

- Stack: Laravel 12, Inertia.js, React, TypeScript, Tailwind CSS, MySQL, Solidity/Hardhat, ethers.js, Leaflet

Flick — QR Code Attendance

Academic / Side project

Cross-platform QR attendance with offline mobile storage and a Dockerized FastAPI backend on Azure for auth and email verification.

- Stack: React Native, SQLite, FastAPI, Docker, Azure

EDUCATION

B.S. Information Technology

2022 – Present

Davao del Sur State College | Digos City, Philippines

- Focus: web development, databases, and software engineering; building production Laravel apps alongside coursework.
- Capstone: NCIP Hybrid Blockchain-Powered Management System (Laravel + ABAC security framework).
